

What Do You Know About Africa?

Activity 1

There are no right or wrong answers to this sheet.

- 1) Is there one environmental problem that particularly bothers you?
- 2) Is there something you could do about it?

Complete the table below as best you can:

What bothers me	How I would like it to be	What I could do about it

3) How much difference could you make if you did something about this problem?

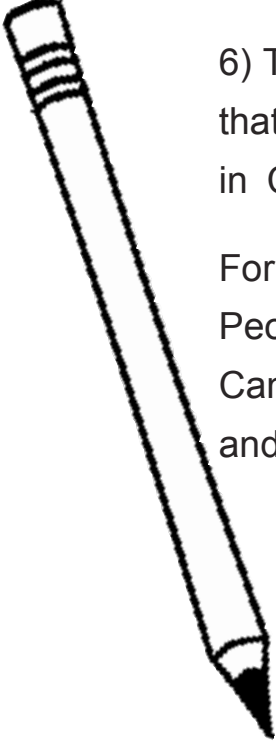

4) Even if you have never been to Togo or Senegal, you may have an idea of what these places might be like.

On a separate sheet, draw any pictures or write any words that come to mind.

5) If you have never been to Togo or Senegal, where do your ideas and images come from?

What Do You Know About Africa?

Activity 1

6) Think of some of the environmental problems in Senegal and Togo that you saw in the video. Do you see the same things happening here in Canada, or is the situation different?

For example:

People worry about the water they drink in both places. In Canada people worry about pollution from chemicals. In Senegal and Togo they worry about having enough water.

7) After you watched the video, how did you feel about young people and environmental problems?

8) Go back to questions one and two. Have you changed your mind about what you wrote? If you have, then use another coloured pen/pencil to change what you wrote before you watched the video.
